

The Future Starts Here.

BTech in Computer Science & Design

A first-of-its-kind BTech program, revolutionizing the way we design, think, and create with AI.

The world is evolving, and so is technology. The next generation of innovators must understand how technology shapes experience— from intelligent interfaces to AI-generated design systems. This program is built for digital pioneers who want to redefine interaction, aesthetics, and intelligence in the digital age.

Every product, app, and digital experience needs smart technology. It also needs design. This program helps you learn both.

Who is this Program For? What You'll Learn?

This program is built for Class XII pass outs (with Maths) who want to shape the future with Generative AI and Creative Coding. It is not a typical BTech course. You will learn coding, software, and digital tools but the focus is not on complex coding. It is on building smart, intuitive, and innovative digital solutions. You will study design, user experience, and interactive media.

Course Highlights : Design, User Experience & Interaction Design; Creative & Emerging

Technology; Interactive & Visual Media; Software & Computational Thinking.

What Makes It Special?

- Industry-Aligned AI & UX Curriculum – Designed with input from global tech leaders for the next generation of designers.
- Balance of Technical & Creative – Focus on AI-driven UX/UI and digital innovation while learning just enough coding.
- Applied Learning Through Real Projects – Gain experience via capstone projects, internships, and live experiments with leading brands.
- Interdisciplinary Approach – Blend human-centered design, computing, AI interfaces, and immersive media.
- Future-Ready Skill Development – Build expertise across UI/UX, creative coding, product design, and digital transformation.
- Beyond Algorithms – Learn to create intelligent experiences that combine AI capabilities with human-centered design principles.

Opening a whole new universe of career options

Software Development

- Full-Stack Developer
- Game Developer
- Backend Developer
- Frontend Developer
- Web & Mobile App Developer
- Embedded Systems Engineer
- Cloud Solutions Architect
- Database Administrator
- AI/ML Engineer
- API Developer

UI/UX & Design-Related

- UI Designer
- UX Designer
- Design Strategist
- Graphic & Motion Designer
- Digital Experience Architect
- Information Architect
- Content Designer
- Usability Analyst
- Visual Designer
- User Researcher

AI & Data Science

- Data Scientist
- Data Analyst
- Robotics Engineer
- Computer Vision Specialist
- AI Solutions Architect
- Business Intelligence Analyst
- AI Ethics Consultant
- Predictive Analytics Specialist
- Conversational AI Developer
- Data Mining Expert
